

# NWS Construction Ltd.

Bringing buildings back to life

This year NWS Construction Ltd celebrates 20 years of trading. During this time, we have grown from a two-man building operation to today's highly successful restoration and renovation specialists.

Based in Bridgnorth, Shropshire, this family company now has 14 full-time employees and a turnover in excess of half a million pounds. By concentrating on period properties, listed buildings and barn conversions, NWS Construction has built up a vast amount of expertise and specialist knowledge through a dedicated workforce fully conversant with the challenges and requirements associated with properties of this type.

We are able to carry out work ranging from fitting a replacement door to converting a whole courtyard of derelict barns into a thriving community of beautifully finished family homes. Our expertise with period timber-framed buildings has recently prompted us to diversify into constructing orangeries and stables to specific designs in traditional morticed and tenoned oak. This is a growing market which fits comfortably within our corporate strategy; however 95% of our core business, much of which is based upon personal recommendation, remains firmly rooted in restoration.

Please feel free to browse our site to find out more about us, look at our work and discover what we have to offer. It's an unfortunate fact that not all builders share our commitment to quality, safety, reliability and fair pricing, so if you have a project in mind, please consider giving us a call - we are proud to be able to furnish references from any of our previous clients.
